

Fire Watch Security Capabilities

Documented unarmed observation and patrol support during qualifying life-safety system impairments.

Company Hammerhead Security Solutions LLC	Security Division Hammerhead Security	Service Model Professional unarmed contract security
---	---	--

Capability Focus

Fire watch requirements are driven by the authority having jurisdiction and the conditions at the site. Hammerhead can evaluate whether it can provide trained, documented watch coverage consistent with the client's and authority's requirements.

Core Capabilities

- Dedicated observation and patrol assignments
- Documented rounds and activity logs
- Immediate communication of observed concerns
- Site-specific routes and watch expectations
- Coordination with client management and emergency procedures
- Temporary coverage during system impairment or qualifying work conditions

Why Hammerhead

Hammerhead combines experienced security leadership, a direct connection to Bluewater Security Academy, site-specific post design, professional unarmed officers, structured reporting, and BluewaterOS operational technology. The objective is not simply to place a guard on a post, but to create a supervised and documented security program around the property.

Best Fit

Properties that have been directed to establish fire watch or that need to evaluate temporary documented coverage while a life-safety system is impaired. Final requirements remain subject to the authority having jurisdiction.

Procurement & Next Step

Hammerhead supports formal proposal and vendor-review workflows. Service availability is subject to applicable licensing, staffing, location, assignment requirements, and contract review. Request a site-specific proposal at hammerheadsecurity.org or call (252) 725-8356.

No weapons are depicted or promoted in Hammerhead website imagery. Hammerhead Security specializes in professional unarmed security services.
