

Warehouse & Logistics Security Capabilities

Unarmed security for distribution centers, warehouses, yards, employee entrances, and shipping/receiving interfaces.

Company Hammerhead Security Solutions LLC	Security Division Hammerhead Security	Service Model Professional unarmed contract security
---	---	--

Capability Focus

Distribution operations need a security post that understands high traffic, shift changes, drivers, vendors, employee access, yards, docks, and after-hours activity. Hammerhead designs the post around those operational realities.

Core Capabilities

- Employee and visitor access support
- Truck-gate and shipping/receiving interfaces
- Yard and perimeter observation
- After-hours and overnight security coverage
- Site patrols and documented activity
- Incident escalation and management notification
- Post orders aligned to facility procedures

Why Hammerhead

Hammerhead combines experienced security leadership, a direct connection to Bluewater Security Academy, site-specific post design, professional unarmed officers, structured reporting, and BluewaterOS operational technology. The objective is not simply to place a guard on a post, but to create a supervised and documented security program around the property.

Best Fit

Warehouses, fulfillment centers, distribution centers, manufacturing logistics operations, and multi-shift facilities needing consistent documented coverage.

Procurement & Next Step

Hammerhead supports formal proposal and vendor-review workflows. Service availability is subject to applicable licensing, staffing, location, assignment requirements, and contract review. Request a site-specific proposal at hammerheadsecurity.org or call (252) 725-8356.

No weapons are depicted or promoted in Hammerhead website imagery. Hammerhead Security specializes in professional unarmed security services.
